

# Rockland County: Major Sand & Gravel Aquifers AND Major Mapped Fractures

**Legend**

- ◊ Rockland County
- Primary aquifers
- Sand & Gravel
- Kame deposits
- Faults & Fractures
- Ramapo Valley Wells
- Spring Valley Wells
- UW System Wells
- ◻ Example Target Zones
- ~ Hudson River
- ~ Major Lakes

Lake DeForest

Groundwater resources of Rockland County have not been fully investigated. Faults and fractures illustrated here may represent only a fraction of many more that further analysis and mapping would reveal. Black circled areas are examples of likely high-yielding aquifer settings, some in sand and gravel deposits, some in fractured bedrock. Yields in some of these locations are likely to be substantial.
